

SEH Computer Systems is pleased to announce the acquisition of the BrokerEDI Gateway from Mastercom Consulting.

The BrokerEDI Gateway is used by many companies in the Mutual Insurance community in Canada for distributing eSlips as well as data exchange between Insurance companies and brokers using CSIO standards. Since 1995 companies have been using the product to send documents and information using digital delivery to improve turn-around times for policy holders, saving physical printing and postage costs and shrinking companies carbon footprints.

“Mastercom has built a valuable product in the BrokerEDI Gateway and we were in a position to provide business continuity and future enhancements technology such as the download of CSIO XML policies to an important technology for our community” explains Mark Ross, CEO of SEH Computer Systems. “This is a win-win-win situation for the Mutual Insurance community, Mastercom and SEH”.

With the expanded product offering SEH Computer Systems will service over 40 Mutual Insurance companies plus their Insurance Broker partners and handle over 1 Million transactions a year.

More information about the software products it offers can be found at the company website:
