SEH Computers acquires Nopper insurance software

Allan Griwatz (left) with SEH Computer Systems Inc. President Kevin Remington.

Paul Nopper & Associates Inc. is pleased to announce the merger of their Nopper insurance software division with SEH Computer Systems Inc.

The definitive agreement which came into effect on January 1, 2015, ensures long term backup of both DOS and Windows Insurance Program (WIP). It also includes the Nopper Auto Quote engine.

Allan Griwatz and Paul Nopper are excited to inform their clients that this is the most pivotal development in the history of the company which began in 1986.

"After a thorough investigation exploring all options," Mr. Griwatz said, "we concluded joining the SEH family of Farm Mutual Insurance companies is the best choice for the future of our clients."

Allan will continue to be the Nopper insurance software's primary contact person. He will join and work with the SEH development team. Together they will provide support along with the evolution of new ideas and products. Going forward, SEH Titan and WIP will incorporate the best of both programs to evolve into a better system for all.

Allan and Paul are proud of what they have achieved in the past and would like to thank you, their clients, for your continued loyalty. "Now, together with SEH, we hope to bring stability and sustainability to your future in the insurance business," Allan concluded.
